JOHNSON'S BIO-CLEAN ALL PURPOSE CLEANER CONCENTRATE Part No. 40-00 Series

DESCRIPTION:

Johnson's Bio-Clean is very concentrated and care should be taken in it's handling. Under normal dilution, Bio-Clean is an environmentally safe, biodegradable all-purpose cleaner that has many uses around a shop or warehouse. This combination of organic and inorganic components provides excellent grease cutting properties in addition to dirt and grime removal. Citrus oils give Bio-Clean extra cleaning power and they provide a fresh, clean scent. Bio-Clean may be used full strength or diluted up to 30:1 for light jobs.

PHYSICAL DATA:

Specific Gravity	1.13 ± .005 @ 60° F (As Shipped)
pH	12 (Full Strength)
Solubility in Water	100%
Appearance	Orange Tinted Liquid
Odor	Citrus Odor

USAGE

To remove oils, grime and heavy soil deposits on equipment or shop floors, use straight or dilute 1:1 and apply liberally, using a brush, mop, rag, sponge or spray bottle. Allow Bio-Clean to loosen dirt; reapply as necessary. Some scrubbing may be necessary to remove the heaviest soils. Caution: dissolved oils and dirt may cause surfaces to become slippery. After cleaning, rinse completely, then thoroughly dry. This product is non-flammable, however it may be corrosive to some plastics, painted or other surfaces, if allowed to soak too long.

HANDLING:

Wear protective clothing and eye wear when handling any cleaner. Please refer to the *OSHA Material Safety Data Sheet* for additional information.

WASTE DISPOSAL:

Used wash water may contain heavy metals or other regulated materials. We cannot make specific recommendations regarding disposal due to variations in local laws.
